Course Description (Catalog)
This course is an analysis of the German-Soviet campaign during World War II. Students will examine the three major phases of this conflict that begins with the Wehrmacht invasion of the Soviet Union in 1941, urban warfare in Stalingrad in the fall of 1942, and history’s largest tank battle at Prohorovka in 1943. Finally, this course will detail the Soviet counterattack across the Vistula and Oder Rivers that ended with the die Gotterdammerung in Berlin.

### Course Scope

The war between Nazi Germany and Soviet Russia was, by any objective standard, by far the most significant and influential aspect of the largest and most costly war thus far in human history. Our perspective in the West, especially in England and the US, is to assume that WE won the war against Germany, with some assistance from Russia. The reality is more nearly the other way around, and it therefore behooves us to come to a better understanding of this titanic and history-altering conflict.

This course will examine this conflict, beginning with the factors that led to the Hitler’s decision to invade the USSR, the stunning initial success of the German *blitzkrieg* in 1941, which fell just short of capturing Moscow, German operations in 1942, which very nearly captured the Soviet oil supplies and culminated in the famous battle of Stalingrad, which resulted in the destruction of an entire German army. The German effort to restore operational freedom with the massive attack at Kursk in 1943, and the subsequent Soviet counter attacks, and then the constant Soviet offensives that culminated in the capture of Berlin and Hitler’s suicide will bring the course to a conclusion.

### Course Objectives

After successfully completing this course, you will be able to:

- Evaluate the personalities of Hitler and Stalin, and their influence over the war and its conduct.
- Assess the role of logistics on the military campaigns.
- Analyze the strengths and weaknesses of both the Wehrmacht and the Red Army.
- Examine the major military campaigns of World War II in the East.
- Critique the military performance of senior generals, as well as the dictators, on both sides.
- Assess the role of airpower on the conflict.
- Examine the genocidal nature of the war in the East.
Analyze the weapons and technology used and developed during the conflict.

Deconstruct some of the myths about the Eastern Front.

Examine a chosen subject from the Eastern Front in great detail, with an emphasis on its impact on the history of the period.

Table of Contents

Course Delivery Method

This course delivered via distance learning will enable students to complete academic work in a flexible manner, completely online. Course materials (Located in Resources in SAKAI) and access to the online learning management system (SAKAI) will be made available to each student. Online assignments are due by Sunday evening of the week except as otherwise noted and include discussion questions (accomplished in Forums), examinations, and individual assignments submitted for review and evaluation by the Faculty Member. Assigned faculty will support the students throughout this course.

Table of Contents

Evaluation Procedures

There will be three types of graded activities in this course – Forum discussion group postings, Combat Mission After Action Reports, and a research paper with a proposal. The breakdown of each activity, in terms of point and percentage of the overall course grade, is given in the table at the end of this section. A brief description of each of these activities follows. For more complete information on the different types of work, see the Assignments section as well as the relevant folder in the Resources section of the course site. The Assignments section will have due dates and point values for the assignments, and the Resources section will have folders with instructions and samples of the assignments for viewing. All of the various assignments are intended to promote and provoke critical and analytical thinking on the part of the students, not simply to regurgitate facts. Assignments may be turned in before the required due date.

The Forum postings are the most frequent of the graded assignments. There will be a total of seven different group topics, a new one every other week, beginning the second week of class, following the Virtual Introduction of the first week. See the Course Outline section of this syllabus, as well as the Calendar, Announcements and Forums sections of the class site for the due dates. The first topic will begin the second week of the term, and will continue until the due date listed in this syllabus, when the next topic will begin. Participation in the discussion topics will be graded on both the number and the quality of a student’s postings. Students will be expected to post both a primary response to the instructor’s original subject/question, as well as a minimum of two responses to other student’s posts. The Initial Post for a given topic will be due by the end of the first Sunday of the two week period, while the Responses will be due by the end of the following Sunday. For example, for the first topic, the Initial Post will be due at the end of Week # 2, and the Responses for that topic due at the end of Week # 3. The topics will be developed in part to encourage the students to do the assigned reading, but also to provoke further investigation, research and thought about the subjects. For further information on the discussion groups and the expectations for them, see the Instructions in the Discussion folder in the Resources portion of the class site. Initial Posts are required to be a minimum of 500 words, and each Response post is to be a minimum of 250 words, although longer posts are allowed and even expected.
Perhaps the most unusual element of the course assignments involves the use of the World War II tactical combat simulator **Combat Mission**. The readings and discussions will generally deal with large issues of strategy and decision-making. The combat simulator will take you to the other end of the knowledge spectrum, the down-in-the-weeds tactical element of World War II ground combat. For this part of the course work, students are required to purchase and install either the first generation game **Combat Mission: Barbarossa to Berlin** (CMBB) or one of the second generation Combat Mission Eastern Front games. These simulations deals with tactical level World War II ground combat, on a scale using infantry squads and individual vehicles, and with unit size ranging up to about that of a regiment or brigade. **Barbarossa to Berlin** deals with combat in the entire region of fighting in the East, from the far arctic north to the Caucus Mountains in the south, from Moscow to Berlin, from the initial invasion to the end of the war. The second generation games deal with more limited time frame and locations, but have much better graphics and improved game play.

One thing that I wish to stress about this game; it is **NOT** a “Video Game” in the way that most people would think of such. That is, it is not the sort of frantic, run around and blast things that one often sees with things like Nintendo or Playstation game systems, or the so-called “shooter” style of computer games. **Combat Mission** is in fact a highly detailed, sophisticated, historically accurate tactical combat simulator. Playing this game is not about the “high score”, but instead about learning the same things that actual World War II combat leaders dealt with – how to read terrain, how to plan a battle, how to organize and control your forces, the importance of combined arms tactics, how to improvise and react to unexpected events on the battlefield, and how to make the most efficient use of your forces. Mastering the game is **NOT** about who can push the right button the fastest, but rather learning about the capabilities of your troops and weapons, and learning how to issue orders that will make the most effective use of them.

One of the most important is that the original game code for the first generation of Combat Mission series of games (CMx1) was written more than a dozen years ago, to be used on much less powerful computers with far less memory and graphics capacity. The other big change since then is that the Windows operating system has gone through nearly half a dozen new versions. While the CMx1 games do in fact work remarkably well on new computers, considering their age, they do occasionally have issues with the more recent versions of Windows – Vista, 7, and 8, especially on laptops, due to the wider variety of graphics chipsets used in laptops as opposed to the bigger cards used in desktops. The newer second generation games (CMx2) have vastly improved graphics and AI, and are designed to work on the most recent versions of Windows. The first Eastern Front CMx2 game will cover the Bagration period on the Eastern Front. Other games will cover different time periods, generally one game for each year. As soon as such second generation games are available, they will be integrated into the course.

For CMBB, students will be required to first work through two tutorial scenarios, the first a relatively small and easy one called **The Iron Roadblock**, and then a larger and more complex tutorial called **Jaegermeister**. Both of these tutorial scenarios **must** be played from the Allied / Soviet side. These tutorial scenarios will introduce them to the various concepts used to maneuver and fight the troops in the simulator in a relatively basic situation. More complete instructions for these tutorials, as well as other information, can be found in the **Combat Mission** folder in the **Resources** section of the class site and in the Instructions for the relevant Assignments. Note that for CMBB, you will only need to write an AAR for the second tutorial, **Jaegermeister**. If you choose to do one of the CMx2 games, the tutorial structure will be a bit more complex, and you will need to make sure to read the Tutorial section of the Combat Mission Instructions on which ones to play and to write the report on.
STUDENT WARNING: This course syllabus is from a previous semester archive and serves only as a preparatory reference. Please use this syllabus as a reference only until the professor opens the classroom and you have access to the updated course syllabus. Please do NOT purchase any books or start any work based on this syllabus; this syllabus may NOT be the one that your individual instructor uses for a course that has not yet started. If you need to verify course textbooks, please refer to the online course description through your student portal. This syllabus is proprietary material of APUS.

Following the completion of the tutorials, each student will be required to choose two additional scenarios. One of these scenarios must be done from the German side, and one from the Allied side. At least one of them must be at least “Medium” in size. Important Note: While you may choose any scenarios in the game, within the parameters listed above, some scenarios are designed to be played only from one side, due to various advantages built into the scenario design for the other side. So you must follow the guidelines in the scenario listing – if it specifies “Allied Only”, for example, then you may only play it from the Allied side. Also, some scenarios are designed to be played only by two human players, and don’t work well with a single human against the AI – those cannot be selected.

As the student works through these scenarios, they will be expected to take notes on the actions and results developed during the course of the battle. The student will also be asked to create a number of screen captures, or screen shots, that will be used to illustrate significant actions during the course of the battle. The procedure for creating these screen image captures can be found in the Game Instructions document in the Combat Mission Folder. Note that there is a free demo version of an image capture program, called Fraps, available from Fraps.com. This program can make the image capture process much easier and quicker, so feel free to take a look at it if you like. These notes and images will be combined to create an After Action Report (AAR) that will not only present an account of the battle, but will also provide an analysis of both the simulator and the lessons that were learned from it.

One very important note on the use of this simulator – whether a student wins or loses the battle has NO impact on their grade for assignment. The grade will be based solely on how well the student chronicled the events and analyzed the action. Sample After Action Reports will be available in a folder in the Resources section, to give students an idea of how the simulators work, as well as how to structure their reports.

Also in the Resources folder will be the AAR Template, which will provide students with a basic template around which they can construct the report. The Format Guide will outline the structure, the various parts of the report, and what is expected in them. The combination of the Format Guide and Sample Reports should provide the student with information on what is expected from these assignments. If you have any questions about these assignments, please ask. These reports are rather untraditional for a written assignment, and it is understood that they may be a bit intimidating at first. But with a bit of practice, most students find the game and the report to be one of the most enjoyable and challenging aspects of the course. The AARs are due every fifth week – Weeks 5, 10, and 15.

The research proposal will be due at the end of Week 4, and the paper will be due at the end of Week 16, so that you don’t have both the paper and the final Combat Mission AAR due on the same week. The paper will be a minimum of 20 pages of text, exclusive of title page, notes, or bibliography. The paper must be about some aspect of the Eastern Front – on the ground, in the air, at sea. Instructions for the proposal, and an example of the format for the proposal can be found in the Research Paper folder in the Resources section of the class site. The annotated bibliography in the Bibliography folder in the Resources section and in the course texts can serve as a starting point for the research for these papers. The paper should follow the appropriate guidelines for form and style listed in the Policies section of this syllabus. There is also a folder in the Resources section containing a PDF file of the US Army’s Center for Military History’s official Writing Manual – an excellent resource for working on the paper.

## The ultimate blitzkrieg – total surprise and the near destruction of the Red Army

Stalin’s paranoia ironically works to blind him to German intentions and preparations. Two defensive lines, neither intact – the Red Army’s disposition on the eve of invasion. A paralyzed army – the Red Army unable to react effectively, and suffers catastrophic losses. The German plan is a near total success, and huge portions of the Red Army are destroyed. The only problem – neither the Red Army nor the Soviet Union disintegrates the way the German plan calls for.

<tr>
<th>8</th>
<th>“No Retreat” – the Wehrmacht thrown back from Moscow, Hitler’s obsession with the Crimean Peninsula</th>
<th>Stalin launches a counter attack, far too ambitiously. The Germans are pushed back, but his goals far outstrip his means, and the attack grinds to a halt. Hitler’s “No Retreat!” order (possibly) helps stabilize the German forces during the battle, and gives Hitler the unfortunate idea that he knows better than his generals how to fight battles. Hitler is ready to try again in 1942, but first requires that the Crimean be secured, to protect the German oil from Ploesti in Romania.</th>

<td>13</td>
<td>The steamroller – the Red Army on the attack, and the vital role American Lend Lease played in sustaining these offensives</td>
<td>A blunt instrument – the Red Army remains tactically crude and ineffective, and its losses are enormous. But it begins to hammer the Wehrmacht flat. Stalin focused Soviet production on weapons. US Lend Lease, especially transportation, keeps the Red Army moving. Lacking American Lend Lease aid, Soviet offensives would have halted much sooner due to lack of supplies, and it would have taken them much longer to throw the Germans out of the USSR.</td>
<td><strong>Assigned Text Reading</strong> Fritz, <em>Ostkrieg</em>, Chapter 8 Merridale, <em>Ivan’s War</em>, Chapter 8 DVD, <em>War of the Century</em>, Episode 4, Vengeance  <strong>Optional Recommended Reading</strong> Hardesty, <em>Red Phoenix Rising</em></td>
</tr>
<tr>
<td>14</td>
<td>“No Retreat!” Hitler’s contribution to the German defeat, making a bad situation far worse.</td>
<td>German defenses against the Red Army are rendered far more difficult and less effective by Hitler’s interference and micromanaging. Hitler’s personality prevents him from authorizing retreats at all – he never gives up on anything. German generals want to conduct a mobile defense, but Hitler’s “No Retreat!” standing orders make that nearly impossible.</td>

### The Greatest German defeat of the war – Operation Bagration and the destruction of Army Group Center

Operation Bagration is the single worst defeat suffered by the Germans of the entire war, but remains almost unknown. Soviet *maskirovka* and its contribution to the success of Bagration

Crude Red Army tactics continue to mean very heavy losses – the endless manpower comes close to running out in late 1944.

**Assigned Text Reading**
- Fritz, *Ostkrieg*, Chapter 10
- Merridale, *Ivan’s War*, Chapter 10

**Optional Recommended Reading**
- Dunn, *Soviet Blitzkrieg*

### Gotterdammerung – the Red Army takes Berlin, Hitler takes his life

Zhukov and Koniev and the race to Berlin

Stalin’s obsession with capturing the city

Despite Hitler’s dislike of the city, he refuses to escape to “last stand” forts in the Alps, and chooses to die in Berlin

Hitler claims Germany “unworthy” of him, and so deserves its own destruction.

**Assigned Text Reading**
- Fritz, *Ostkrieg*, Conclusion
- Merridale, *Ivan’s War*, Chapter 11

**Optional Recommended Reading**
- Beevor, *The Fall of Berlin*

### Assignment

**Research Paper**

Please see the [Student Handbook](#) to reference all University policies. Quick links to frequently asked question about policies are listed below.
Writing Expectations

Assignments completed in a narrative essay or composition format must follow the accepted guidelines of the American historical profession, which is the Chicago Manual of Style. This course will require students to use the citation and reference style established by Kate Turabian in A Manual for Writers of Term Papers, Theses, and Dissertations, 7th ed. (Chicago, IL: University of Chicago Press, 1996), which is the most readily available distillation of the Chicago Manual. See Chicago Style Manual.

The Chicago Style Manual for book-length works and its Turabian offshoot for research papers have long been the standard across all fields of study, as well as much of the publishing industry. These texts cover the layout and production gamut—including rules for chapter headings and subheadings, abbreviations, alphabetizing non-English names, and table design/designation.

1. Front matter—e.g., title page, copyright statement, dedication, table of contents, lists of illustrations or tables, acknowledgements, abstract.
2. Narrative with scholarly attributions.

Citation and Reference Style

History papers are distinguished by standardized notational schema. These display the primary and secondary sources being quoted or used in the construction. Your professors will certainly call for footnotes or endnotes, but also may request a formal bibliography:

- **Endnotes/Footnotes**, the primary focus in Chicago / Turabian, are used to indicate the source of a quotation, paraphrase, or resources—as well as to add explanations or digressions outside the flow of the main narrative.

- **Bibliography** is a device at the end of the paper, which highlights the materials cited as a separate, alphabetized list in addition to the endnotes or footnotes.

- *Turabian* and the Chicago Manual use sequential Arabic numbers. The numbers are normally collective and at the end of quotations, paraphrased sentences, or paragraphs for collected references. Note numbers:
  1. May be in-line, but preferably set in raised superscript.¹
  2. Should come at the end of the paragraph and collectively account for the resources used. Do not insert for each sentence. The exception is if a short quotation is used within a paragraph. Then cite as appropriate for the information preceding the
STUDENT WARNING: This course syllabus is from a previous semester archive and serves only as a preparatory reference. Please use this syllabus as a reference only until the professor opens the classroom and you have access to the updated course syllabus. Please do NOT purchase any books or start any work based on this syllabus; this syllabus may NOT be the one that your individual instructor uses for a course that has not yet started. If you need to verify course textbooks, please refer to the online course description through your student portal. This syllabus is proprietary material of APUS.

For a full explanation go to: http://www.apus.edu/Online-Library/tutorials/chicago.htm#notation

Late Assignments

Students are expected to submit classroom assignments by the posted due date and to complete the course according to the published class schedule. As adults, students, and working professionals I understand you must manage competing demands on your time. Should you need additional time to complete an assignment please contact me before the due date so we can discuss the situation and determine an acceptable resolution. Routine submission of late assignments is unacceptable and may result in points deducted from your final course grade.

Netiquette

Online universities promote the advance of knowledge through positive and constructive debate--both inside and outside the classroom. Discussions on the Internet, however, can occasionally degenerate into needless insults and “flaming.” Such activity and the loss of good manners are not acceptable in a university setting--basic academic rules of good behavior and proper “Netiquette” must persist. Remember that you are in a place for the fun and excitement of learning that does not include descent to personal attacks, or student attempts to stifle the discussion of others.

- Technology Limitations: While you should feel free to explore the full-range of creative composition in your formal papers, keep e-mail layouts simple. The Educator classroom may not fully support MIME or HTML encoded messages, which means that bold face, italics, underlining, and a variety of color-coding or other visual effects will not translate in your e-mail messages.

- Humor Note: Despite the best of intentions, jokes and--especially--satire can easily get lost or taken seriously. If you feel the need for humor, you may wish to add “emoticons” to help alert your readers: ;-), : ), ☺

Online Library
STUDENT WARNING: This course syllabus is from a previous semester archive and serves only as a preparatory reference. Please use this syllabus as a reference only until the professor opens the classroom and you have access to the updated course syllabus. Please do NOT purchase any books or start any work based on this syllabus; this syllabus may NOT be the one that your individual instructor uses for a course that has not yet started. If you need to verify course textbooks, please refer to the online course description through your student portal. This syllabus is proprietary material of APUS.

The Online Library is available to enrolled students and faculty from inside the electronic campus. This is your starting point for access to online books, subscription periodicals, and Web resources that are designed to support your classes and generally not available through search engines on the open Web. In addition, the Online Library provides access to special learning resources, which the University has contracted to assist with your studies. Questions can be directed to librarian@apus.edu.

- **Inter Library Loans:** The University maintains a special library with a limited number of supporting volumes, collection of our professors’ publication, and services to search and borrow research books and articles from other libraries.
- **Electronic Books:** You can use the online library to uncover and download over 50,000 titles, which have been scanned and made available in electronic format.
- **Electronic Journals:** The University provides access to over 12,000 journals, which are available in electronic form and only through limited subscription services.
- **Smarthinking:** Students have access to ten free hours of tutoring service per year through Smarthinking. Tutoring is available in the following subjects: math (basic math through advanced calculus), science (biology, chemistry, and physics), accounting, statistics, economics, Spanish, writing, grammar, and more. Additional information is located in the Online Library. From the Online Library home page, click on either the “Writing Center” or “Tutoring Center” and then click “Smarthinking.” All login information is available.

The AMU/APU Library Guides provide access to collections of trusted sites on the Open Web and licensed resources on the Deep Web. These are specially tailored for academic research at APUS:

- Program Portals contain topical and methodological resources to help launch general research in the degree program. To locate, search by department name or navigate by school.
- Course Lib-Guides narrow the focus to relevant resources for the corresponding course. To locate, search by class code (e.g., HIST500) or class name.

If a guide you need isn't available yet, let us know by emailing the APUS Library: librarian@apus.edu

Selected Bibliography

There is an annotated bibliography file in a folder titled Bibliography in the Resources section. This listing is a strong sampling but by no means all of the literature on the Eastern Front, and should be taken as a starting point. This list is broken down into various categories, such as the Air War, Campaigns, Weapons, etc.

There is also a file listing the complete titles published by Ballantine in the 1970s, most of which deal with World War II. Many of these books were written by experts in their field, and remain surprisingly good sources. The series is out of print, but most titles can be obtained used from Amazon or eBay quite inexpensively.
