Course Description (Catalog)

This course is a study of the theoretical, historical, and contemporary issues associated with quarantine as a public health and safety measure. Students will learn of quarantine strategy, implementation, effectiveness, and debate. The course topics will include consideration of quarantine as a health and safety measure in the modern homeland security strategy.

Course Scope

This course examines quarantine and related methods of separating infectious cases from susceptible hosts in a historical perspective and in current practice. In a broader sense, the course focuses on control of communicable diseases, particularly those diseases that have epidemic or pandemic potential. The course emphasizes the process of quarantine, the policy of quarantine, and effectiveness. The course examines the debate on quarantine with respect to personal rights, public safety, and international regulations.

Course Learning Objectives

After successfully completing this course, students will be able to:
• **CO-1** - Assess how effective control of communicable disease is determined by disease attributes, infrastructure, and location.

• **CO-2** - Discern the historical use of quarantine and other related control measures compared to current practices and the factors that prompted change.

• **CO-3** - Analyze concepts associated with the quarantine process.

• **CO-4** - Appraise epidemics and pandemics that have raised national and international concern, and which of these employed quarantine or related control measures.

• **CO-5** – Evaluate current quarantine policy and how it is affected by the debate on human rights, personal freedom, and governmental power.

• **CO-6** - Investigate selected infectious agents of concern for military operations and/or potential terrorist events.

---

**Course Delivery Method**

This course delivered via distance learning will enable students to complete academic work in a flexible manner, completely online. Course materials and access to an online learning management system will be made available to each student. Online assignments are due weekly as noted on the course outline and can include Forum questions and written assignments. Assigned faculty will support the students throughout this eight-week course.

---

**Course Materials**

**Required Course Textbook:**

4. Other materials can be found in the ‘Lessons’ section of the classroom.

Academic Writing Requirements:
The School of Health Sciences requires use of APA format and style and all students are encouraged to have a current copy of the *APA Publication Manual*. All written assignments are to be submitted in APA format style unless otherwise noted in the assignment directions.

Web Sites
In addition to the required course texts, the following public domain web sites are useful. Please abide by the university’s academic honesty policy when using Internet sources as well. Note web site addresses are subject to change.
- None

Evaluation Procedures

Forum
Please join the forums each week. Replies must be posted in the week due and replies after the end of the each week will not be graded. The Forums are for student interaction and input should be submitted before the week ends in order to fully participate in the discussions. Students should demonstrate their own knowledge in the forums and avoid copying and pasting from websites.

Guidelines:
- Post the initial response to each forum by 11:55pm, ET, Wednesday.
- Initial responses should be no less than 450 words.
- Initial responses are to be original in content and demonstrate a thorough analysis of the topic.
- Reply to at least 2 of your classmates in each forum by 11:55pm, ET, Sunday.
- Replies to classmates should be no less than 200 words.
- Responses to classmates are significant to advance the forum.
- All forums can be accessed in the Forums section of the course.
- Forum rubric is included in the forum section of the course
- Additional guidelines for week one forum introduction are included in the forum tab within the course
- More in-depth specific instructions for each forum can be found in the forum tab within the course.
- Late Forum posts receive a 10% per day late penalty. If your 2 peer responses are posted after the week is ended (after Day 7, Sunday) they receive a zero, in that the
STUDENT WARNING: This course syllabus is from a previous semester archive and serves only as a preparatory reference. Please use this syllabus as a reference only until the professor opens the classroom and you have access to the updated course syllabus. Please do NOT purchase any books or start any work based on this syllabus; this syllabus may NOT be the one that your individual instructor uses for a course that has not yet started. discussion is over and you cannot receive credit for participation in a discussion with others after the discussion week has closed.

Students will be responsible for providing a peer response posting for at least two (2) of their peers’ postings, unless there are less than 3 students in the course, where only one (1) peer posting will be required. Your peer postings should challenge or expound upon at least one of the points made by your peer, and “I agree” does not constitute as an adequate response. As graduate students, you will be expected to provide comprehensive, relevant and well supported points in your assignments.

We all bring something unique to the classroom, from our understanding, our experiences, and our value systems. We honor and respect each person’s diverse beliefs to help us see beyond the classroom to be the most effective individuals we can be. Therefore, we should all be respectful of others while expressing our viewpoints and opinions. Proper netiquette behavior is expected. Any inflammatory, demeaning or disrespectful language in a posting will be immediately removed from the discussion space.

Assignments
There will be two case studies due during the course. The first is due in week 6 and the second in week 8. All assignments should follow proper APA format and include all information given in the Assignment Instructions. All assignments must be submitted through the link in the classroom and must receive a TurnItIn score before being graded. Assignments that are not in proper format may not be read by TurnItIn. It is your responsibility to make sure your submission receives a score. If the score is above 20%, this indicates plagiarism. A submission with a high TurnItIn score should be rewritten and resubmitted prior to the due date.

- More in-depth specific instructions for each assignment can be found in the Assignment tab within the course.
- Assignments submitted late without advance notice will receive a 5% per day late penalty and will not be accepted for grading five (5) days past the due date.
