STUDENT WARNING: This course syllabus is from a previous semester archive and serves only as a preparatory reference. Please use this syllabus as a reference only until the professor opens the classroom and you have access to the updated course syllabus. Please do NOT purchase any books or start any work based on this syllabus; this syllabus may NOT be the one that your individual instructor uses for a course that has not yet started. If you need to verify course textbooks, please refer to the online course description through your student portal. This syllabus is proprietary material of APUS.

American Public University System
The Ultimate Advantage is an Educated Mind

School of Health Sciences
PBHE550
Research Methods in Public Health
3 Credit Hours
Length of Course: 8 weeks
Prerequisite: None

Instructor Information

Please refer to the Syllabus tab for your instructor’s contact information and biography.

Course Description (Catalog)

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research on topics within their field of study. The course is intended to provide a foundation from which the student may use the knowledge and practices gained in this course throughout the rest of their graduate program.

Course Scope

This course of study will take the student through the various steps of a traditional research design. The student will select a specific and appropriate research topic in their discipline which will be approved by the instructor. With the approved topic, the student will begin to acquire the basic information and tools in order to complete a research proposal. By accomplishing exercises, the student will gather information, assess materials, and analyze data. This will result in the submission of a final research proposal.

Course Learning Objectives

After successfully completing this course, students will be able to:
1. Demonstrate proficiency in the use of selected research methods and tools.
2. Describe and examine the scientific method.
3. Accomplish specific research tasks: hypothesis construction, conceptualizing terms, literature review, data collection, critical analysis, and communicate findings.
4. Evaluate data and critically assess research findings.
5. Judge the usefulness of various research approaches: quantitative, qualitative, and mixed methods analysis.
6. Show graduate level critical thinking and writing.

Course Delivery Method

This course delivered via distance learning will enable students to complete academic work in a flexible manner, completely online. Course materials and access to an online learning management system will be made available to each student. Online assignments are due weekly as noted on the course outline and can include Forum questions and written assignments. Assigned faculty will support the students throughout this eight-week course.

Course Materials

Required Course Textbook:

Additional Readings:

STUDENT WARNING: This course syllabus is from a previous semester archive and serves only as a preparatory reference. Please use this syllabus as a reference only until the professor opens the classroom and you have access to the updated course syllabus. Please do NOT purchase any books or start any work based on this syllabus; this syllabus may NOT be the one that your individual instructor uses for a course that has not yet started. If you need to verify course textbooks, please refer to the online course description through your student portal. This syllabus is proprietary material of APUS.

Academic Writing Requirements:
The School of Health Sciences requires use of APA format and style and all students are encouraged to have a current copy of the APA Publication Manual. All written assignments are to be submitted in APA format style unless otherwise noted in the assignment directions.

Web Sites
In addition to the required course texts, the following public domain web sites are useful. Please abide by the university’s academic honesty policy when using Internet sources as well. Note web site addresses are subject to change.
- Public Health Research Methods Student Study Site: http://studysites.sagepub.com/guestph/study/default.htm
- Purdue Online Writing Lab: https://owl.english.purdue.edu/owl/resource/560/01/

Evaluation Procedures

Forums
Please join the forums each week. Replies must be posted in the week due and posts after the end of the week will not be graded. The Forums are for student interaction and input should be submitted before the week ends in order to fully participate in the discussions and in the class each week. Students should demonstrate their own knowledge in the forums and avoid copying and pasting from websites.

Guidelines:
- Post the initial response to each forum by 11:55pm, ET, Wednesday.
- Initial responses should be no less than 450-500 words.
- Initial responses are to be original in content and demonstrate a thorough analysis of the topic.
- Reply to at least 2 of your classmates in each forum by 11:55pm, ET, Sunday.
- Replies to classmates should be no less than 200 words.
• Responses to classmates are significant to advance the forum.
• All forums can be accessed in the Forums section of the course.
• Forum rubric is included in the forum section of the course
• Additional guidelines for week one forum introduction are included in the forum tab within the course
• More in-depth specific instructions for each forum can be found in the forum tab within the course.
• Late Forum posts receive a 10% per day late penalty. If your 2 peer responses are posted after the week is ended (after Day 7, Sunday) they receive a zero, in that the discussion is over and you cannot receive credit for participation in a discussion with others after the discussion week has closed.

Students will be responsible for providing a peer response posting for at least two (2) of their peers’ postings, unless there are less than 3 students in the course, where only one (1) peer posting will be required. Your peer postings should challenge or expound upon at least one of the points made by your peer, and “I agree” does not constitute as an adequate response. As graduate students, you will be expected to provide comprehensive, relevant and well supported points in your assignments.

We all bring something unique to the classroom, from our understanding, our experiences, and our value systems. We honor and respect each person’s diverse beliefs to help us see beyond the classroom to be the most effective individuals we can be. Therefore, we should all be respectful of others while expressing our viewpoints and opinions. Proper netiquette behavior is expected. Any inflammatory, demeaning or disrespectful language in a posting will be immediately removed from the discussion space.

Assignments
For this course, students will be required to submit a writing assignment each of the eight (8) weeks. All papers should be formatted in APA format and style and are due by Sunday of each week.

• More in-depth specific instructions for each assignment can be found in the Assignment tab within the course.
• Assignments submitted late without advance notice will receive a 5% per day late penalty and will not be accepted for grading five (5) days past the due date.
